

apoquel[®]
(oclacitinib maleate)

Dosing Table

APOQUEL indications:

- **Control of pruritus associated with allergic dermatitis.**
- **Control of atopic dermatitis in dogs at least 12 months of age.**

APOQUEL dosage and treatment schedule:

- The initial dose of APOQUEL is 0.4 to 0.6 mg/kg, administered orally, twice daily for up to 14 days.
- For maintenance therapy, the same dose is administered only once a day.
- APOQUEL tablets can be administered with or without food.
- The treatment duration with APOQUEL tablets is adapted according to the underlying disease and severity of itch.

Bodyweight of dog (kg)	Strength and number of tablets to be administered		
	APOQUEL 3.6 mg tablets	APOQUEL 5.4 mg tablets	APOQUEL 16 mg tablets
3.0 - 4.4	1/2		
4.5 - 5.9		1/2	
6.0 - 8.9	1		
9.0 - 13.4		1	
13.5 - 19.9			1/2
20.0 - 26.9		2	
27.0 - 39.9			1
40.0 - 54.9			1 ^{1/2}
55.0 - 80.0			2
